PROFILE

Full Stack Developer who thinks in systems and builds end-to-end: from designing Django REST APIs and PostgreSQL schemas to implementing React interfaces. Hired from an internship after delivering production features for real clients; built a logistics platform as a capstone project, tested in a real-world business environment. Brings an engineering problem-solving mindset to software. Available for a full-time Co-op placement starting May 2026; legally eligible for work terms up to 12 months.

TECHNICAL SKILLS

Languages: JavaScript, Python, TypeScript, HTML5, CSS3, SQL

Frontend: React, Vue.js, Angular, Bootstrap

Backend: Node.js, Express, Django, REST APIs

Databases: PostgreSQL, MongoDB, MariaDB, Supabase

DevOps & Cloud: Docker, AWS (Lambda, EC2), GitHub Actions, CI/CD, Vercel, Render, Netlify

Tools: Git/GitHub, Postman, Figma | Agile, Scrum, ScrumBan

TECHNICAL EXPERIENCE

Web Developer · Epochteca, Morelia, México

Sep 2023 – Dec 2024 · Web development & SaaS agency · Promoted from intern

- Developed a Shopify integration for a CFDI billing platform, syncing orders, tax data, and payment confirmations via webhooks and PayPal services.
- Built appointment scheduling and patient-facing modules for a clinic management system, including calendar views and automated email notifications.
- Led multiple Figma-based redesign iterations for an online university platform, improving instructor workflows and course management usability.
- Worked autonomously after onboarding, delivering features end-to-end and collaborating directly with stakeholders.

Design & Electronics Intern · Vetelia, Querétaro, México

Jan 2019 – Jul 2019 · During final year of B.Eng.

- Assisted in the design of an electric motorcycle, contributing to 3D modelling and component layout.
- Built Arduino-based prototypes and adjusted component mounting to improve structural stability.

ADDITIONAL EXPERIENCE

Retail Associate · District Factory Outlet, Vancouver, B.C.

Apr 2025 – Present

- Customer service in English across a diverse clientele; inventory management and store displays.

Inventory & Administrative Assistant · Comercial Tacamba, Morelia, México

Jan 2021 – Nov 2021

- Reconciled supplier invoices against purchase orders across two branches; flagged and resolved discrepancies.
- Coordinated between branches, suppliers, and accounting to maintain inventory records and schedule payments.

EDUCATION

Full Stack Web Developer Diploma · Canadian College of Technology and Business, Vancouver, B.C.

Jan 2025 – Present

- Coursework in networking, Linux, databases, software design, DevOps, and full-stack web development.
- Capstone: EchoRoute — full-stack logistics platform (React · Django · PostgreSQL · Leaflet) built from a real operational problem, now tested in a live business environment. echoroute-wine.vercel.app

Full Stack Developer Certification · Jala University (Jalasoft), Bolivia (Remote)

Oct 2022 – Mar 2023

- Contributed components to an existing Angular e-learning platform across Scrum sprints; built backend services with TypeScript, Node.js, and Docker; designed UI/UX with Figma.

Full Stack Developer Bootcamp · Innovación Virtual by Microsoft, Mexico City

Jan 2022 – May 2022

- Built web applications using HTML, CSS, JavaScript, and Vue.js.

B.Eng. Mechanical Engineering — Design & Manufacturing · Instituto Tecnológico de Morelia, México

Graduated 2020

HONOURS & AWARDS

1st Place — Hack the Ocean Hackathon · Innovación Virtual / Microsoft (Remote)

May 2022

- Built OCEX Encyclopedia, an interactive endangered species world map, delivering a full MVP in 24 hours. (ocex.netlify.app)
